Phase 1: Google Cloud Setup

Phase 2: Create Credentials

Phase 3: Connect to Application

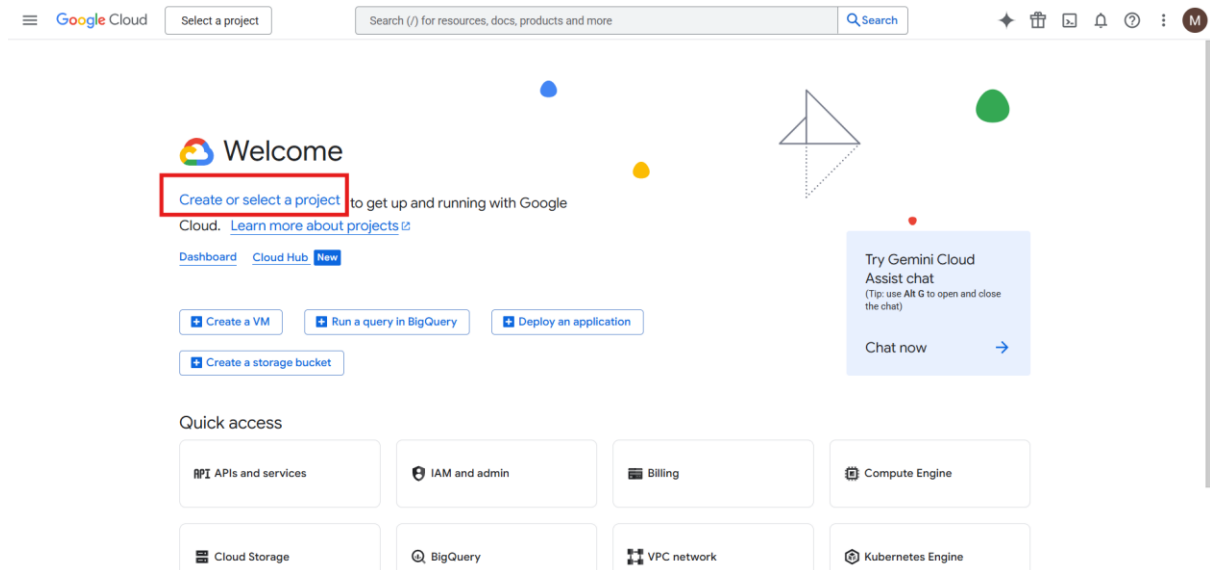

Phase 4: Grant Access to Sheets

Phase 5: Dashboard Configuration

1 Phase 1: Google Cloud Setup

We need to activate the Google Cloud project to allow the API to communicate with your documents.

1. **Go to Google Cloud Console:** Visit console.cloud.google.com and sign in.

2. Create a New Project: Click the project dropdown (top bar).

- Select **"New Project"**.
- Name it *Fonarev-360-Sheets*.

Google Cloud

Search (/) for resources, docs, products and more

3. Enable Google Sheets API Go to APIs and service → Library

4. Search for "Google Sheets API" in the top search bar.

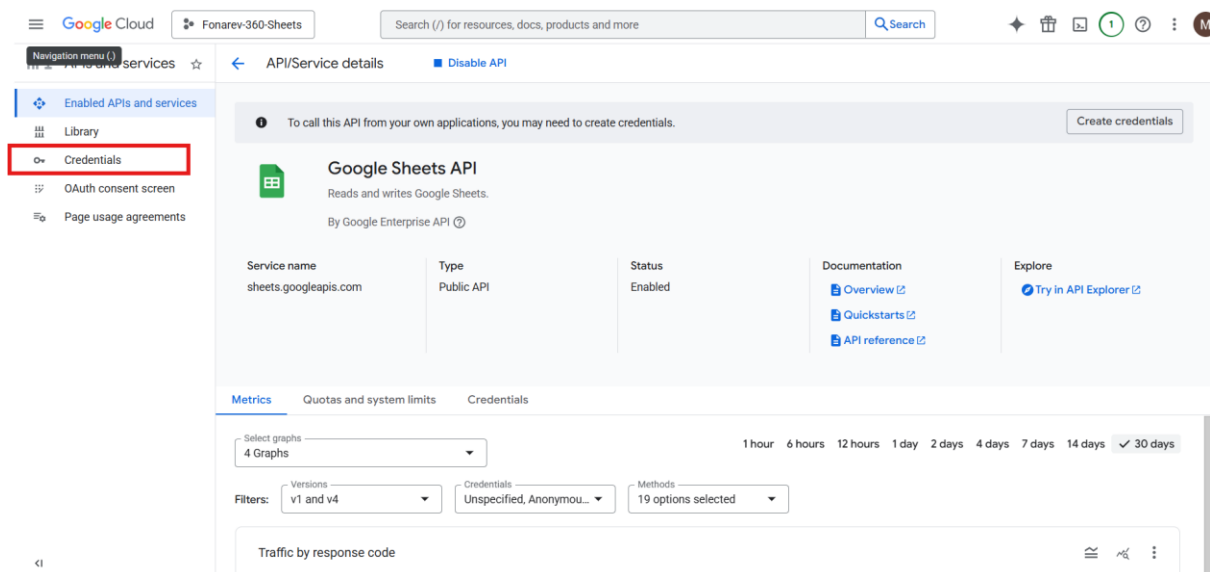

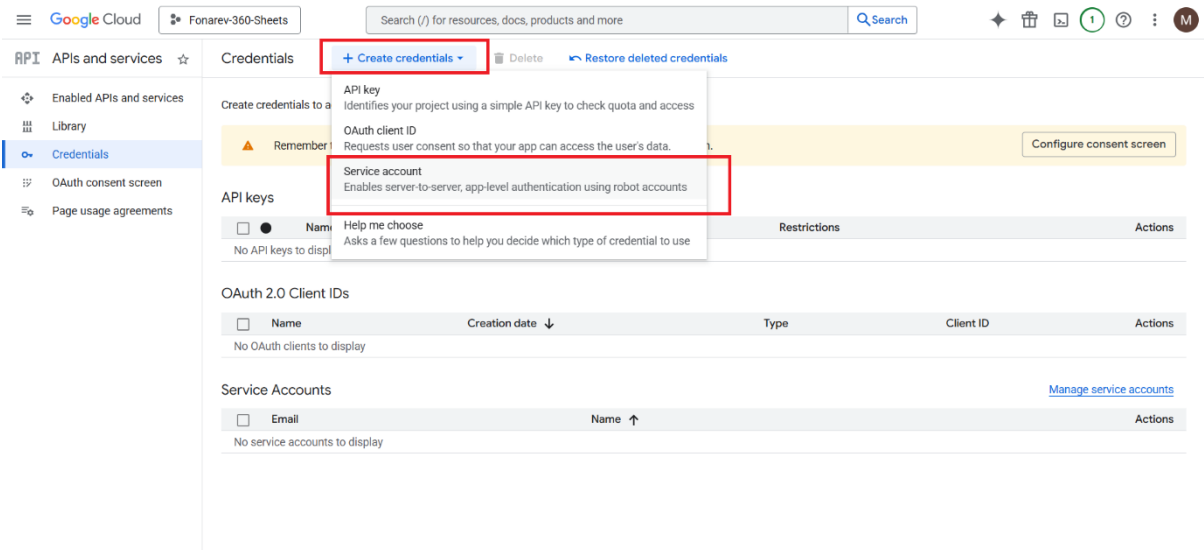

2 Phase 2: Create Service Account

A "Service Account" is like a robot user that securely accesses the sheets on behalf of the system.

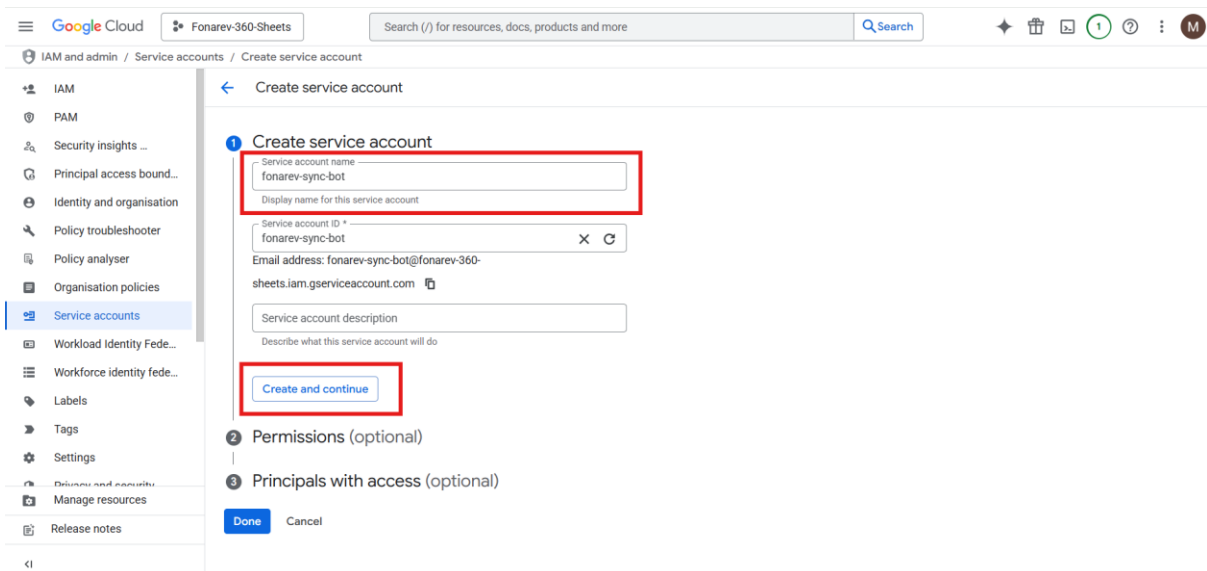

1. Navigate to APIs & Services > Credentials

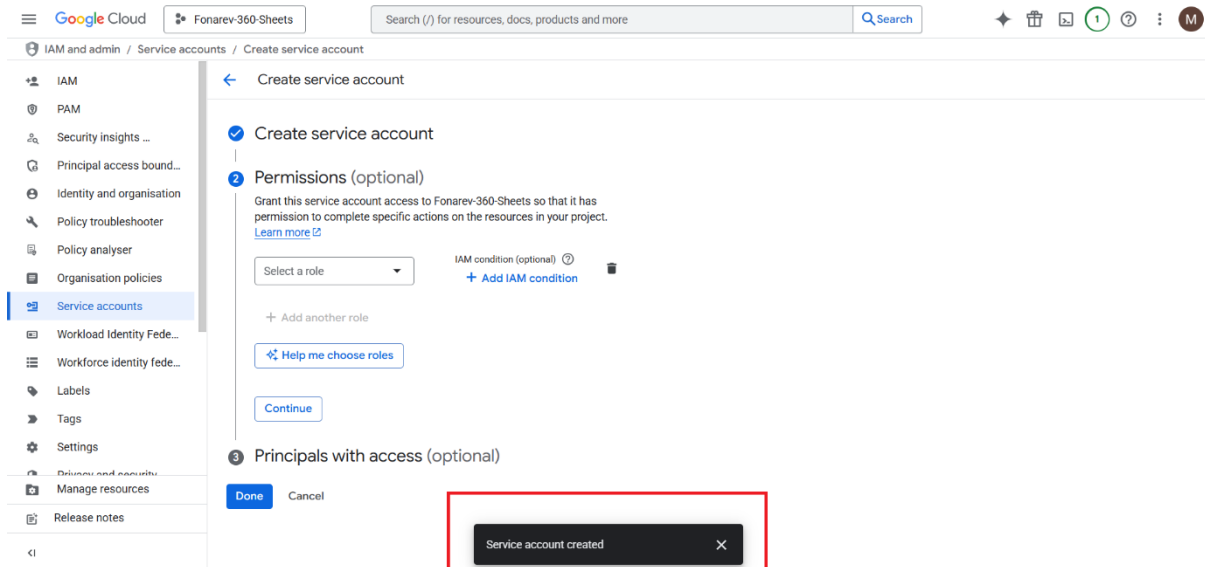

2. Click "+ CREATE CREDENTIALS" and select Service Account

3. Name: Enter fonarev-sync-bot

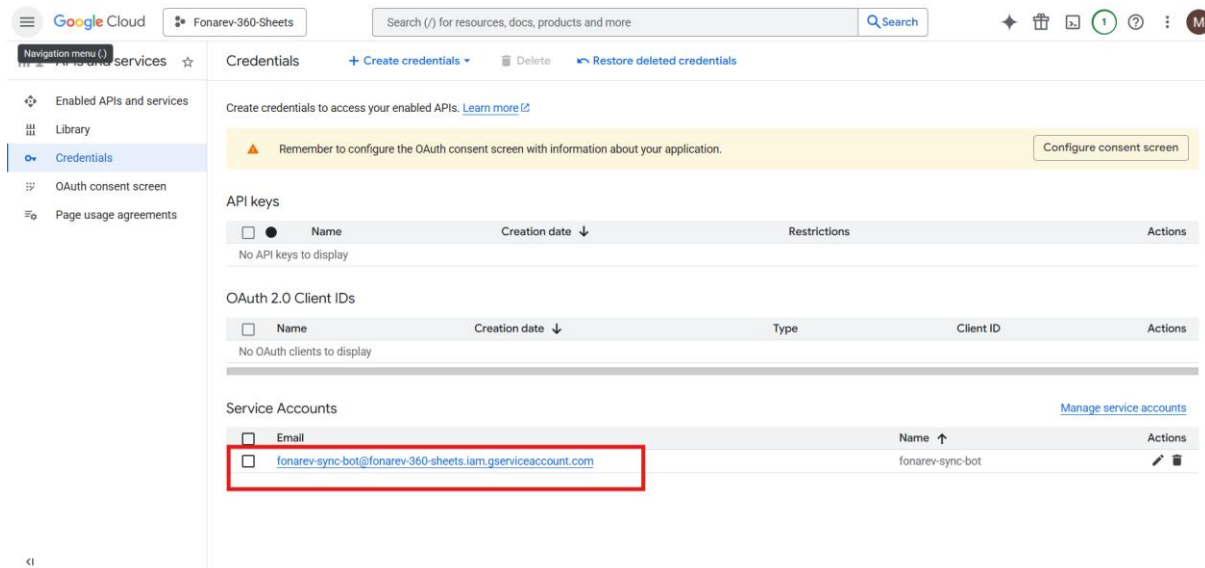

4. Click Create and Continue->Done

Generate the Key (Important!)

Click on the newly created Service Account email.

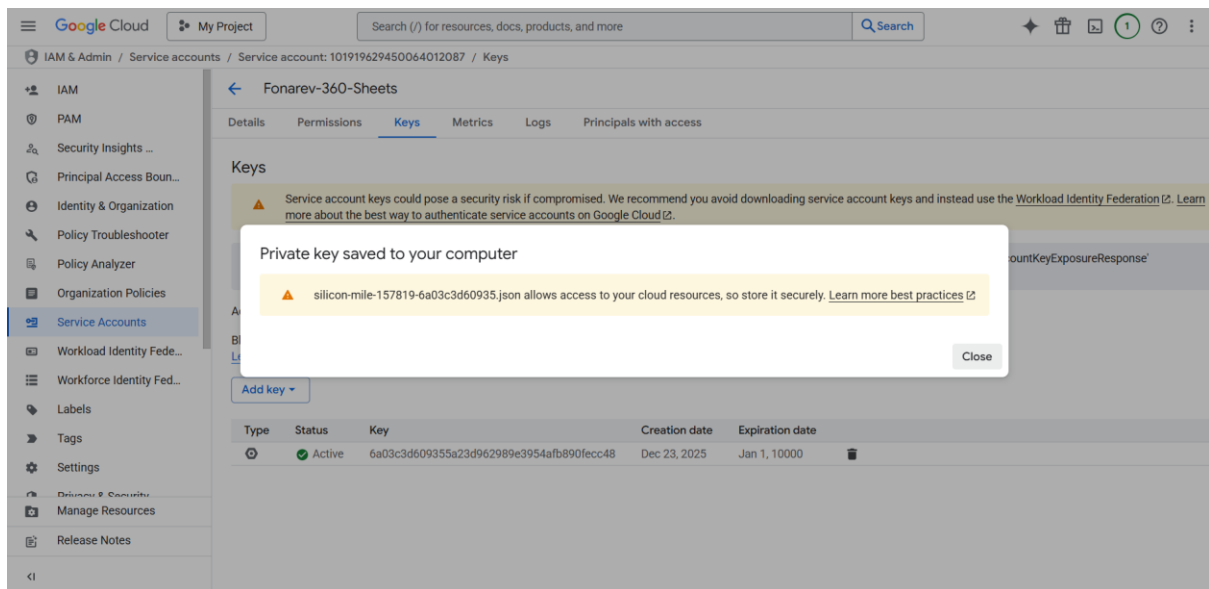

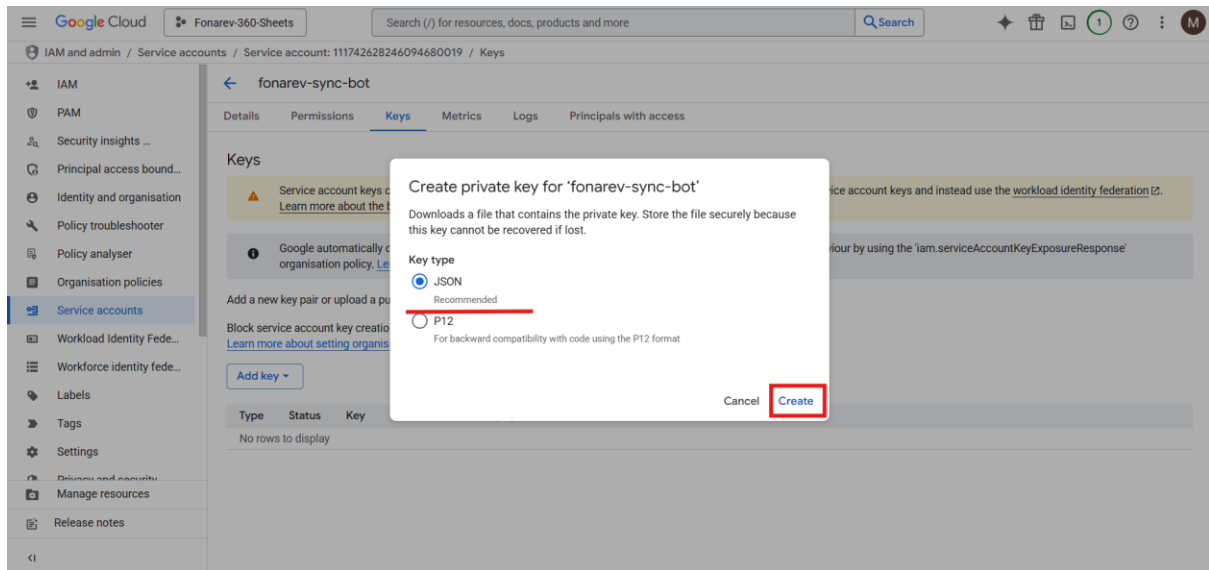

Go to the KEYS tab.

The screenshot shows the Google Cloud IAM and admin console. The left sidebar contains a navigation menu with options like IAM, PAM, Security Insights, and Service accounts. The 'Service accounts' option is selected. The main content area shows the 'fonarev-sync-bot' service account details. The 'Keys' tab is highlighted with a red box. Below the tabs, the 'Service account details' section shows the name 'fonarev-sync-bot', description, email 'fonarev-sync-bot@fonarev-360-sheets.iam.gserviceaccount.com', and unique ID '111742628246094680019'. The 'Service account status' section shows the account is 'Enabled'. The 'Advanced settings' section is partially visible.

Click ADD KEY > Create new key

The screenshot shows the Google Cloud IAM and admin console, specifically the 'Keys' tab for the 'fonarev-sync-bot' service account. The 'Add key' button is highlighted with a red box. Below the button, there is a table with columns 'Key', 'Creation date', and 'Expiry date'. The table is currently empty. The 'Add key' button has a dropdown menu with options 'Create new key' and 'Upload existing key'.

Select JSON and click Create

Save File:

A file will download automatically. This is your masterkey. Keep it safe.

Phase 3: Connect to Application

1. Rename the downloaded JSON file to: google-service-account.json
2. Upload this file to the application server in the folder: /F360API-client/config/

Phase 4: Grant Access to Sheets

By default, the robot cannot see your private sheets. You must share them.

Copy Email:

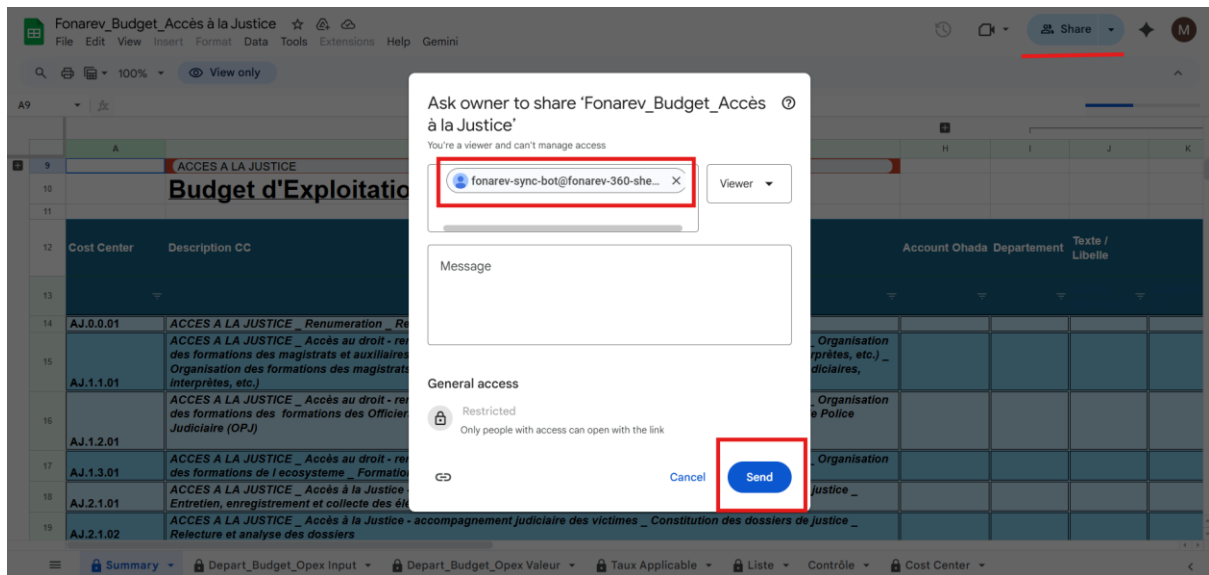

Go back to Cloud Console Credentials and copy the Service Account Email (e.g. fonarev-sync-bot@fonarev-360-sheets.iam.gserviceaccount.com).

1. Open your target Google Sheet (e.g., Department Budget).
2. Click the big Share button (top right).
3. Paste the Service Account Email.
4. Set permission to Viewer (or Editor).
5. Click Send

Repeat this for all 17 department sheets.

The screenshot shows the Google Cloud Console interface. The left sidebar has a menu with 'APIs and services' selected. The main content area is titled 'Credentials' and includes a search bar and a 'Create credentials' button. Below this, there are three sections: 'API keys' (empty), 'OAuth 2.0 Client IDs' (empty), and 'Service Accounts'. The 'Service Accounts' section has a table with one entry. The email address 'fonarev-sync-bot@fonarev-360-sheets.iam.gserviceaccount.com' is highlighted with a red box.

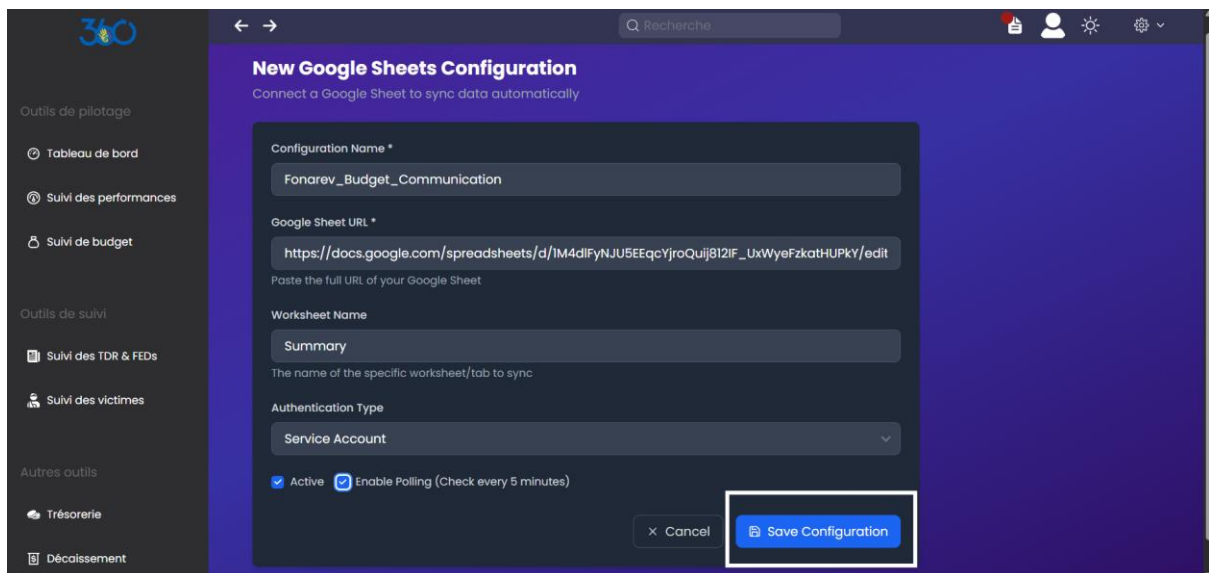

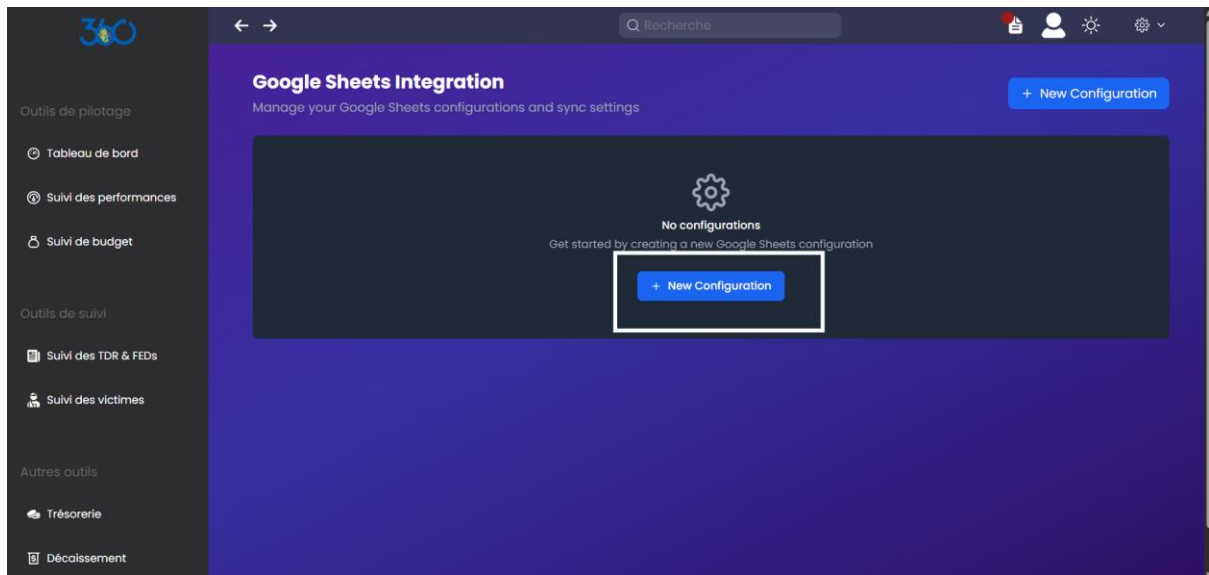

Service Accounts						
☐	Email	Name	Creation date	Type	Client ID	Actions
☐	fonarev-sync-bot@fonarev-360-sheets.iam.gserviceaccount.com	fonarev-sync-bot				Manage service accounts

Phase 5: Dashboard Configuration

Finally, link the sheets inside the Fonarev 360 Dashboard.

1. Open Settings > Google Sheets in the dashboard.
2. Click New Configuration
3. Fill in the details:
 - Name: "Legal Department"
 - URL: Paste the Google Sheet URL
 - Auth Type: Service Account
 - Polling: Referenced (Checked)
4. Click Save

Success:

The system will now auto-detect the layout and sync data every 5 minutes.
